PROFESSIONAL SUMMARY

Full-Stack Software Engineer specializing in Angular, React, Java, and Python. Led an enterprise Adobe AEM migration, built REST/GraphQL APIs, and automated CI/CD pipelines. Currently in a QA automation role at a major bank, actively seeking to return to full-stack development.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, Java, SQL, HTL/Sightly, JSP
- **Frontend:** Angular, React, NgRx, RxJS, HTML/CSS
- **Backend:** Node.js, Express, Flask, Java (Spring/EE)
- **CMS:** Adobe AEM (component development, content fragments, Adobe Target)
- **DevOps/Cloud:** AWS (EC2, S3), Docker, Jenkins, CI/CD, Git (Github/Bitbucket)
- **Testing:** Selenium, JUnit, Mockito, Postman, Karate, API Automation
- **Databases:** MySQL, MongoDB, SQLite, Postgres
- **Methodologies:** Agile/Scrum, TDD, Jira, Confluence

WORK EXPERIENCE

Capco – Consultant (Software Engineer Consultant) | Orlando, FL | Mar 2021 – Present

- **Client: Huntington National Bank – QA Automation Engineer | Jan 2026 – Present**
 - Led QA automation strategy for newly developed APIs, building robust testing framework in Karate and Insomnia.
 - Mentored junior QA automation engineers in automation best practices, code reviews, and continuous integration methodologies.
 - Collaborated with product and development teams during story creation to ensure full QA representation and comprehensive test coverage.
- **Client: Prudential – Software Engineer | Mar 2022 – Aug 2025**
 - Led full-stack migration from Drupal/Angular to Adobe AEM, improving performance, security, and maintainability.

- Developed Angular and AEM custom components from stakeholder requirements, ensuring high standards for accessibility and responsiveness.
- Built backend Java logic for service layers and integration points within AEM, enabling seamless full-stack functionality.
- Designed & implemented automated AEM tag creation scheduler, programmatically creating the link for pages to content fragments, assets, and streamlining data-driven rendering.
- Created API-driven content fragment scheduler to reliably import and organize data for hundreds of funds.
- Implemented scalable Data Layer framework for advanced analytics and personalized user experiences.
- Collaborated cross-functionally with backend teams to design/improve APIs and synchronize data integration.
- Owned the defect lifecycle for 7 high-priority templates, triaging, coordinating, and resolving issues with a focus on product stability.
- Conducted daily syncs with stakeholders, clarifying requirements and delivering regular progress updates that earned recognition for reliability.
- Established testing best practices: Automated unit testing scripts, peer code reviews, deployments across all environments (Dev, QA, Stage, Prod), and defined Adobe Target implementation standards.
- Delivered AEM migration on schedule with zero critical defects in production.

EDUCATION

University of Central Florida – Full Stack Web Development Bootcamp | Orlando, FL

Valencia College – Associate of Arts | Orlando, FL
